Geoscience - Breaking New Ground

The AEGC has established itself as the foremost petroleum, mineral and water resource industry conference in the region, incorporating the ASEG-PESA International Geophysical Conference and Exhibition, and jointly hosted by the Australian Institute of Geoscientists (AIG), Australian Society of Exploration Geophysicists (ASEG), and Petroleum Exploration Society of Australia (PESA).

Under the principal conference theme of **Geoscience - Breaking New Ground**, the AEGC technical program will have a focus on Geology, Geophysics and Geochemistry and how these are applied in exploration for both Petroleum and Mineral systems in Australasia and the wider Asia-Pacific region. The major themes and areas for discussion include:

- Sustainability and ESG
- Energy Transition, Geothermal, Near Surface and Environmental Geophysics
- Regional, Crustal and Basin-scale Geoscience
- Minerals Geoscience
- Petroleum Geoscience
- Hydrogeology and Groundwater
- Undercover Exploration
- Case Studies and Integrated Data Interpretation
- Laboratory and Geochemical Studies
- AI and Machine Learning Applications
- New Themes and Directions

Why attend AEGC 2023 in Brisbane?

- Crossing the boundaries between Oil & Gas and Minerals
- 280+ Accepted Short Abstracts
- 25+ Sponsors - sponsorship opportunities selling out fast
- Over 70 Exhibitors under one roof - 50% sold
- High Quality and Diverse Technical Program
- Extensive Networking Opportunities and Social Program
- Six days featuring keynote speakers, concurrent sessions, poster presentations and workshops delivered by leading experts in their respective streams

A MUST ATTEND EVENT!

Sponsorship and Exhibition
Opportunities selling out - showcase
your brand to an expected 1000+
delegates
